

Using STEEM to buy WEKU

Login into your steem wallet in website: steemit.com, and click "Transfer".

The screenshot shows the Steemit wallet interface. At the top, there is a search icon, an edit icon, a profile icon, and a hamburger menu icon. Below this is a dark navigation bar with the Steemit logo and the text "beta". The navigation bar includes links for "Blog", "Comments", "Replies", "Rewards", "Wallet", and "Settings". Below the navigation bar, there are links for "Balances", "Permissions", and "Password". A prominent green button says "BUY STEEM OR STEEM POWER". The main content area shows the "STEEM" balance as "24,492 STEEM" with a dropdown arrow. A dropdown menu is open, showing options: "Transfer" (underlined in red), "Transfer to Savin", "Power Up", "Buy", "Sell", and "Market". Below the balance, there are sections for "STEEM POWER" and "STEEM DOLLARS", each with a brief description of the token.

Input account: "winwinwin" into "To" box, input amount, **input "your WEKU account" in memo in lowercase(very important, so that we know where to transfer WEKU in wekuchain, for example: eric001, means you want WEKU token to be transferred to the WEKU account: "eric001" in weku chain)**

then click Next, and then click "OK" in the confirm transfer dialog.
